

ZG-90 Cold Zinc Galvanising Paint

ZG-90 cold zinc Galvanising spray is intended as a repair coating for newly galvanized metal that requires repair or recoating to match the original finish. The coating can be applied to bare metal, welded metal or slightly corroded metal. This superior product is incredibly fast drying thus improving job times and finish. Several light coats are advised and give better performance than one heavy coat. ZG-90 cold zinc Galvanising paint is matched to the colour of new galvanized surfaces making the product ideal for fences, security railings, roller shutter doors, gutters and duct work. ZG-90 is ideal for steel structures, off shore rigs, bridges, and automotive panels. Do not apply to the inside of potable water storage containers not to be used on food surfaces. This product contains zinc, aluminium fillers, solvents and surfactants. ZG-90 can be used as an undercoat or a topcoat. Drying time is 3 minutes for touch dry and 20 hours for hard dry (based on 20°C). ZG90 is shower proof in 5 minutes.

AS SEEN ON DISCOVERY'S "WHEELER DEALERS"

500ml Spray with 2 spray nozzles
Product Code 1785
Colours
500ml Aerosol Plant Machine Yellow Code 2045
500ml Aerosol Red Product Code 1938
